

FIRM CAPABILITIES

COMPANY OVERVIEW:

THA ARCHITECTURE, an SBA-Certified WOSB was founded in 2005 in Huntsville, Alabama as a full-service architectural and interior design firm. The firm has expertise as Certified Sensitive Compartmented Information Facilities Designers, as well as Certified Smart Cities Practitioners by the Smart Cities Council, the leading Global Organization for Smart Cities, Smart Buildings, Strategies, Policy, Research and Technologies. The business has grown to specialize in major renovations and complex phasing, often during occupancy of mission-critical and secure federal facilities. We have repeat clients in the federal, aviation, municipal, and private sectors throughout the United States and OCONUS. Our Architectural "one point of contact program management" approach has proven to produce highly successful project outcomes, resulting in 94% repeat business managing design-bid-build, design-build and fast-track delivery projects. Our vast experience in design-build projects has allowed us to bridge the gap between design intent and construction execution with precision and efficiency. This expertise provides cost estimating benefits to the design, efficient value engineering decisions early in the process, reduced change orders, reduced duration of project schedules, and overall improved risk mitigation. Our understanding of these critical key factors produces projects on time and within budget, producing successful project outcomes and protecting partnerships.
